Dear >>venture>> community,

Welcome to the 2026 >>venture>> Award Ceremony, where we gather to celebrate another extraordinary year of entrepreneurship, innovation, and ambition. This year, >>venture>> reached a new milestone with a record 451 applications, a testament to the remarkable energy and talent that continue to shape Switzerland's startup ecosystem.

2026 has also marked an important evolution for >>venture>>. We introduced the Spotlight Award, a new annual recognition whose theme will shift each year to reflect the social and economic forces shaping our world. This year's focus is the innovative use of Apertus LLM and the vital importance of sovereign, transparent artificial intelligence developed in Switzerland by ETH Zurich, EPFL, and the Swiss National Supercomputing Centre. As technology reshapes societies and economies around the world, supporting open and independent innovation is essential.

None of this would be possible without the dedication of our mentors, jurors, partners, and Advisory Board members. Their commitment deepens the spirit of collaboration that makes Switzerland such a distinctive and fertile place for innovation to flourish.

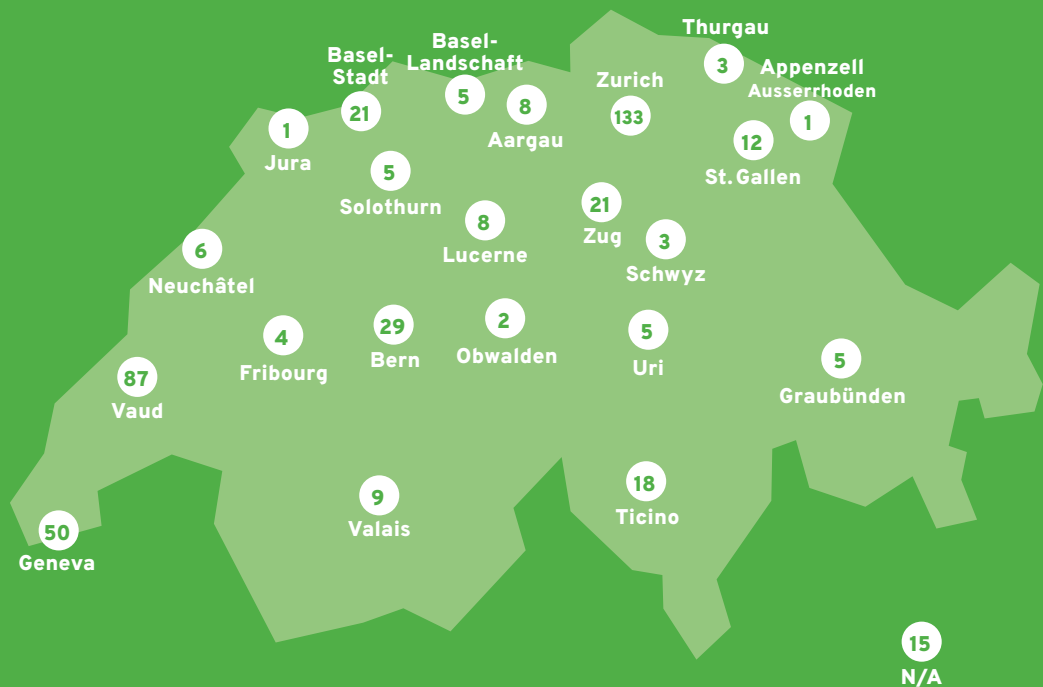

Tonight, we celebrate not only achievement, but the future being built through entrepreneurship, vision, and perseverance. We are proud to be part of it. Enjoy the evening and let's find out together what happens when we dare to venture forward.

**ULRICH JAKOB LOOSER
CHAIRMAN OF THE
>>VENTURE>> FOUNDATION
OPERATING PARTNER OF BLR & PARTNERS AG**

**LEA FIRMIN
CEO OF THE

THE >>VENTURE>> JOURNEY

Registrations

451 participants submitted a 10-20 page startup plan to take part in the competition

OCTOBER 2025 TO FEBRUARY 2026

MARCH 2026

Jury Round 1

Jurors evaluated the startup plans online & selected 10 Semi-finalists per vertical + 10 Spotlight Award candidates

Mentoring

Semi-finalists benefited from the expertise of our accomplished network of startup coaches

APRIL 2026 TO JUNE 2026

MAY 2026

Jury Round 2

Semi-finalists pitched their ideas to a live jury who selected the 3 finalists per vertical + 3 Spotlight Award Finalists

Jury Round 3

The Advisory Board members, split into 6 verticals + a Spotlight Award commission, selected the winning teams

JUNE 15, 2026

JUNE 15, 2026

Grand Prize Pitch

Vertical winners pitch one final time in front of the assembled Advisory Board to win the overall Grand Prize

AWARD CEREMONY

JUNE 15, 2026

FINALISTS

2026

Scan the QR code after the Award Ceremony for a recap of the vertical, Audience & Spotlight Award winners and which startup took home the 2026 Grand Prize.

WHO ARE
THIS YEAR'S
WINNERS?

FINALISTS

BUSINESS & FINANCE

REGCHECK

RegCheck uses AI to simulate regulatory audits, helping regulated firms spot compliance gaps before submission and enabling more consistent reviews.

Alistair Venables, Aharon Yechezkel, Anna-Marie Makarova

LOCATION
Wohlen

2026 SPECIAL AWARDS

SPOTLIGHT AWARD

The new **Spotlight Award** honors ventures tackling a pressing topic for the Swiss economy, ecosystem and society.

This year's theme celebrates **Apertus**, Switzerland's sovereign open-source LLM.

Following a high-stakes pitch session earlier today, a special jury has selected one winner from three standout finalists.

Tonight we reveal which of them takes home CHF 50,000!

Anyway

ANYWAY SYSTEMS

turns any GPU machine into a private AI cluster in 30 minutes, alongside Apertus to deliver a fully transparent, privacy-first AI foundation.

contact@anyway.dev

noemon

NOEMON

builds AI that learns while running—applying its tech to Apertus to extend context, cut costs, and allow customization.

info@noemon.com

≥ Public AI

PUBLIC AI SWITZERLAND

a customer-owned cooperative that distributes affordable AI to Swiss residents and businesses, like a Migros for AI.

founders@spiu.ch

AUDIENCE AWARD

Tonight, you get to be the jury.

During the ceremony, three startups will take to the stage for a 60-second pitch. Then it's up to you to choose the winner!

When prompted by the moderator, scan the QR code shown on stage to cast your vote.

The startup with the most votes wins an extra CHF 10,000 - thanks to you!

BIRDS&CO.

Floating cork platforms redirect protected nesting waterbirds from boats, enabling peaceful, legal cohabitation on Swiss lakes.

info@birdsenco.ch

CINDER

integrates multi-modal heat, TENS, and infrared therapy into everyday clothing, making effective treatment easy to stick to.

paola@fromcinder.com

KWER

merges co-creation and universal design for accessible, beautiful products with meaningful social impact.

benjamin.schalk@dversa.studio

2026 >> VENTURE >> SEMI-FINALISTS

BUSINESS & FINANCE

AMELIORATIO.AI

builds self-improving software using AI agents, enabling companies to integrate AI into their products with the best possible performance.

hello@nevertwice.ai

ConFlip

CONFLIP

helps employees and organizations resolve workplace conflicts and integrity violations through a confidential, AI-guided support platform.

simona.santamaria@conflip.ch

DO ME A FAVOUR BUDDY

predicts employee burnout a week in advance, giving companies evidence-based prevention alerts and intervention tools to reduce

turnover costs.

don@dmafb.app

LINK GENETIC

LINK GENETIC

builds infrastructure for persistent links, preventing broken references and content drift across documents, websites, and AI systems.

contact@linkgenetic.com

NATIVE AI GUARD

a Swiss-built AI firewall protecting companies against emerging AI-powered cybersecurity threats – 100% Swiss-made and operated.

info@nativeai.ch

NAVI

helps startups screen top candidates faster and

cheaper – role-expert AI agents run first interviews and skill simulations well beyond the CV.

contact@worknavi.app

SURELIO.AI

provides independent AI quality assurance through behavioral testing, red teaming, and threat modelling for organizations deploying AI.

gaetan.stein@surelio.ai

CONSUMER SOLUTIONS

BiZBus

BIZBUS

a door-to-door electric intercity service for business travelers, built for predictable arrivals, productive journeys, and low emissions.

peter@bizbus.group

CONTRA

turns any racket sport amateur into a data-driven athlete, launching with padel to bring performance tracking, smart matchmaking, and coaching.

federico@contra-sports.com

FRIDGE

makes habit-building social, helping people stay consistent through shared goals, group accountability, and meaningful built-in incentives.

diego@fridgeapp.co

KWER

merges co-creation and universal design to make everyday products that unite accessibility, beautiful aesthetics, and

meaningful social impact.

benjamin.schalk@dversa.studio

OOVIE STUDIOS

creates AI-powered music-interactive films that change in real time with live performances, enhancing how orchestras connect with audiences.

giulio@ooviestudios.com

PIN SPORT APP

connects athletes, clubs, and fans to discover events, find teams, and grow together – making local sports visible across Switzerland and DACH.

info@pinsportapp.ch

Reclaim

RECLAIM

helps people break compulsive phone habits using neuroscience-

based guidance to build healthier, more intentional relationships with technology.

mixue@reclaimwhatmatters.com

INDUSTRIALS & ENGINEERING

NEOSENS

NEOSENS

builds nanophotonics-based portable biosensors for rapid, on-site detection of toxins in water, bringing lab-grade testing directly to the field.

marco.fumagalli@neosens-dx.com

nordfen

NORDFEN

automates 3D environment creation from geodata in hours, not weeks, delivering realistic digital twins compatible with any simulation system.

info@nordfen.ch

NORIWARE

develops 100% biobased materials that fit into existing production processes designed for plastic, retaining all its functionality and performance.

info@noriware.com

ROBOA

snake-like robots inspect and perform work in confined spaces across industry and infrastructure, going precisely where nothing else can go.

info@roboa.ch

VERRETEX

converts waste glass fibres into high-value materials, enabling circular, industrial-scale manufacturing across a range of sectors.

mitchell.anderson@verretex.com

WINDUCTION

enables public buses to charge wirelessly through their wheels, with no cables, no delays, and no visible infrastructure required.

ride@winduction.com

WINDWORKS

develops smart wind turbines that turn local wind into reliable, affordable on-site power, helping businesses and communities gain energy autonomy.

info@windworks.ai

ARBORIX

develops 3D-printed nerve grafts with native branching to recover nerve function in mastectomy,

facial palsy and other complex nerve injuries.

patrick.weber@hest.ethz.ch

AUSCULTANET

transforms stethoscopes into AI-powered diagnostic tools, helping physicians detect heart valve disease at the bedside, fully offline.

contact@auscultanet.ch

BEYOND DIAGNOSTICS

develops real-time tests to verify medication quality at the point of use, making life-saving biologics safer and reducing waste.

maren.schinz@beyond-diagnostics.com

com

CELLKINETICA

helps women get pregnant faster by advancing in vitro fertilization through deep genomic analyses of embryo viability and development.

CINDER
 contact@celkinetica.com
 SWITZERLAND

CINDER

integrates multi-modal pain therapy, heat, TENS, and infrared, into everyday clothing, making effective treatment something people actually stick to.

paola@fromcinder.com

HAPTIPAL

builds a wearable navigation system leveraging VR-based spatial computing to deliver intuitive tactile guidance for visually impaired users.

HaptiPal@163.com

NALGOOVA THERAPEUTICS

combines precision pain mapping with targeted Micro-RF therapy to reduce systemic treatments and improve outcomes in craniofacial pain.

marzia@nalgoova.com

PHARMA & BIOTECH

AZURECELL

engineers neuroprotective cell therapies for Parkinson's disease, combining genetic circuits with scalable manufacturing for durable neuroregeneration.

info@azurecell.co

BIOSCIBEX

has developed a machine that makes monoclonal antibody production faster, more cost-effective, and safer than any existing method.

contact@bioscibex.com

CANCENTUS

is transforming cancer treatment with next-generation Antibody-Drug Conjugates, redefining precision for safer and more

effective therapies.

contact@cancentus.com

ELDIAN BIOMED

develops injectable microcushions that lubricate cartilage and calm inflammation, providing longer-lasting relief and slowing osteoarthritis.

gregor@eldianbiomed.com

PRECIMUNE

develops AI-powered immune biomarkers to predict cancer immunotherapy response and guide precision medicine using high-resolution immune sequencing.

johanna.chiffelle@unil.ch

UNOMR

develops sensors that provide unprecedented protein data to pharma,

**biotech, food tech, and
academia, enabling the
next medical revolution.**

info@unomr.com

VISIENCO

VISIENCO

**combines AI and robotics
to automate organoid
workflows, making 3D
biological models scalable,
reproducible, and ready for
drug discovery.**

info@visienco.ch

SOCIAL & ENVIRONMENTAL IMPACT

ANURA-LEAGUE

**connects digital gaming
with real ecosystems,
motivating young people to
explore, understand, and
protect biodiversity in their
neighborhoods.**

info@anura-league.com

belian·earth

BELIAN.EARTH

**uses AI and causal science
to build independent
baselines for nature-based
conservation projects,
restoring integrity to global
carbon markets.**

info@belian.earth

CORAlliance
Coastal and Ocean Regeneration Alliance

CORALLIANCE

**enables reef regeneration
at km²-scale by applying
an algae-based hydrogel
enriched with coral tissue
onto degraded reefs using
ROVs.**

info@corall.eco

PUBLIC AI SWITZERLAND

**is a customer-owned
cooperative that distributes
affordable AI to Swiss
residents and businesses,
like a Migros for AI.**

founders@spiu.ch

SYNATURE

**builds AI sound systems
that monitor animal health
and presence in nature, on
farms, and in aquaculture,
enabling smarter, greener
decisions.**

olivier@synature.ch

TIVANO

**aligns ecosystem restoration
with durable carbon
removal by permanently
storing biogenic carbon in
engineered underground
vaults at scale.**

team@tivano-carbon.com

YourOpenLXM

YOUROPENLXM

**creates sovereign, dynamic
OpenLXMs from people's
real-world experience with
Yepa AI, giving governments
and training providers skills
intelligence.**

joris.felder@yllyl.ch

**Behind every great
venture, there are people
who believed before
anyone else.**

**To those who gave their
time, their expertise, and
their resources so that the
next generation of
entrepreneurs could find
their footing: >>venture>>
would not exist without
you.**

THANK YOU.

MENTORS AND JURORS 2026
