Preface

Dear >>venture>> community,

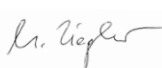

This year has been one of many exciting and successful changes for >>venture>> and we couldn't be more pleased. Starting this year, we have done away with the Business Plan and Business Idea tracks and have merged them into one: Business Case. We've introduced three different industry verticals in which startups could apply: Health & Nutrition, Hardware and Software & Services. Our winners were also selected after live pitching sessions instead of written submissions. Last but not least, we've increased the stakes by doubling the prize money to a total of CHF 350,000.

Revamping the competition came as a natural next step for us as part of the evolution of the Swiss startup ecosystem. Changing the competition and increasing the prize money was the right decision: We're proud to say that we've received an unprecedented amount of submissions- 250 to be exact, from all over Switzerland.

>>venture>> 2019 would not have been possible without the invaluable contributions of the Advisory Board and the over 200 mentors, jurors and experts, who provide pro-bono support to the >>venture>> teams. Our thanks go to all our supporters and our congratulations to the fantastic startup teams you will meet tonight. We wish you an unforgettable evening at ETH!

Prof. Dr. J. Mesot
President, ETH Zurich

Dr. M. Ziegler
Senior Partner,
McKinsey & Company

Dr. T. Knecht
Founder of >>venture>>,
Chairman, Knecht Holding

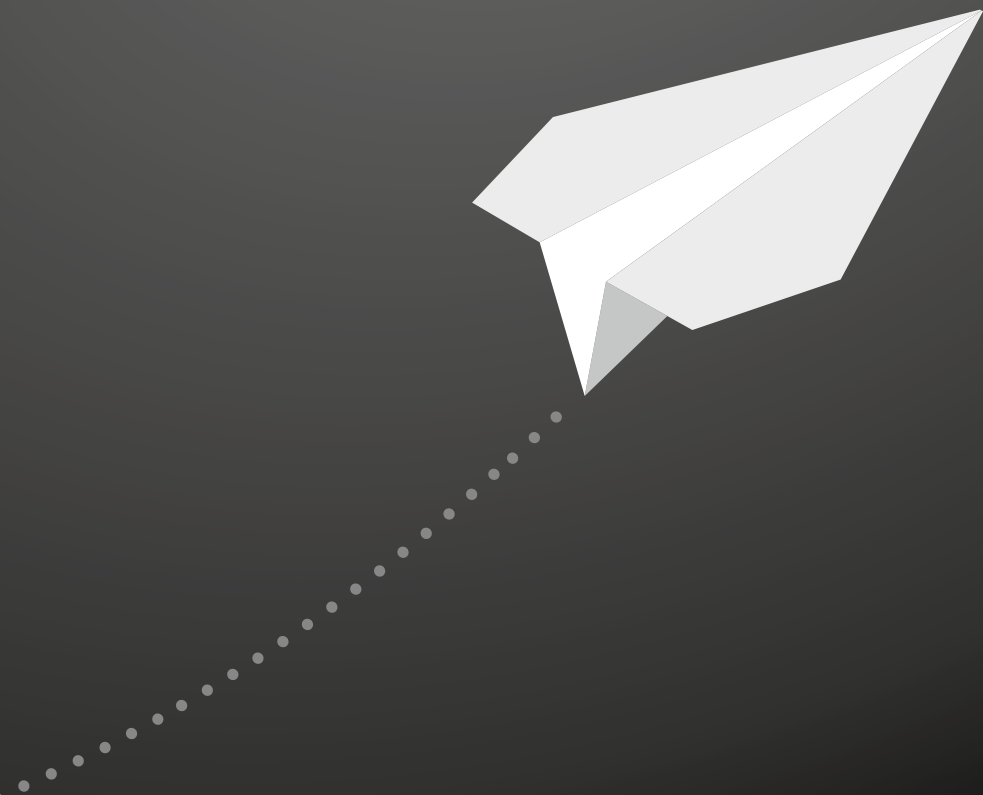

A. Kudelski
President, Innosuisse

Prof. Dr. M. Vetterli
President, EPFL

Program

- 18:00 Welcome by
Dr. Thomas Knecht,
Founder of >>venture>>
- 18:15 Audience Award
- 18:25 Keynote speech by
Prof. Dr. Joël Mesot,
President of ETH Zurich
- 18:45 Health & Nutrition Awards
- 18:55 Hardware Awards
- 19:05 Software & Services Awards
- 19:15 Grand Prize Winner
- 19:25 Closing
- 19:30 Apéro riche

Health & Nutrition

Hardware

Software & Services

2019 >>venture>> Finalists

Health & Nutrition

Annaida Technologies Sàrl

Annaida's technology, based on magnetic resonance, can be used to detect and quantify chemical compounds in living microscopic entities, such as human embryos or stem cells, label-free and non-invasively.

>> marco.grisi.88@gmail.com

Emuna

Emuna, together with leading ophthalmic specialists, have identified ALCAM/CD166 as a promising target and are developing a drug for the prevention of corneal graft rejection.

>> morgancampbellhunter@gmail.com

EraCal Therapeutics AG

The Swiss biotech startup EraCal Therapeutics Ltd. develops a novel anti-obesity drug with superior efficacy and safety compared to the standard of care.

>> josua.jordi@eracal.ch

planted foods AG

Planted creates tasty 'meat' directly from plants - and skips the animal. Their plant-based meat is sustainable, healthy and cruelty-free.

>> pascal@planted.ch

RetinAI Medical AG

RetinAI develops software to make eye clinics & health institutions more efficient using Artificial Intelligence through building tools that collect, organize and analyze health data from the eyes, empowering healthcare professionals and patients with unique data analysis supported by AI.

>> carlos@retinai.com

Synendos Therapeutics AG

Synendos has developed breakthrough safe and effective therapies for neuro-psychiatric disorders through the modulation of a new drug target that enables the restoration of natural function of the brain.

>> chicca@ibmm.unibe.ch

TOLREMO therapeutics AG

TOLREMO therapeutics AG aims to fundamentally change the way modern cancer drugs are used by creating small molecules that can be combined with existing cancer drugs to prevent resistance development and increase patient survival.

>> info@tolremo.com

2019 >>venture>> Finalists

Hardware

Dronistics

Our market-ready AI-powered flying drone delivery solution enables SME's as well as e-commerce giants to integrate instant, autonomous on-demand drone delivery into their offering.

>> k.robbins@dronistics.ch

ELDICO Scientific AG

ELDICO develops, produces and sells electron diffractometers for the analysis of solid compounds enabling industrial and scientific researchers to characterize what were, until now, unmeasurable nano-crystalline systems.

>> gebhardt@eldico.ch

SWISTOR

Swistor

Swistor provides a disruptive energy storage solution that allows the charging of devices in seconds with an extended battery lifetime all while using environmentally-friendly materials.

>> clara.moldovan@epfl.ch

HexagonFab Ltd.

HexagonFab designs and develops biosensors for life science research, industrial monitoring & medical diagnostics that require high-sensitivity, rapid and real-time protein testing.

>> christoph.bieberstein@hexagonfab.com

hiLyte Sàrl

hiLyte developed a consumable based iron battery that enables people who live off the grid to get light and charge a phone. It is the only solution providing clean, safe, affordable, and on-demand electricity in rural Africa.

>> briac.barthes@hilyte-power.com

Rigi Technologies GmbH

Rigi is building technology that enables drone delivery to integrate into any existing supply chain, making a whole new range of drone-enabled deliveries possible.

>> adam@rigi.tech

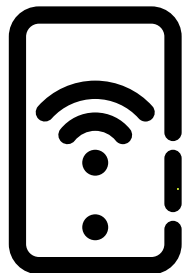

Voliro

Voliro develops the next generation of autonomous flying robots with the unique capability to approach, touch, and interact with the environment. Voliro robots are "Hands in the Sky" that can perform work at high elevations, eliminating the need for expensive and dangerous scaffolds, rope access teams and cranes.

>> contact@voliro.ch

2019 >>venture>> Finalists

Software & Services

decentriq AG

decentriq's Intelligent Cryptographic Membrane (ICM) resolves the pain-point at the intersection of machine learning and cryptography to enable machine learning model training on confidential datasets without compromising user privacy.

>> maximilian.groth@decentriq.ch

GeoCTRL

GeoCTRL AG

Wouldn't it be great to have a Google Analytics for the physical world? GeoCTRL is developing technology to measure the audience of real-world businesses to enable outstanding service.

>> bernardo@p-mv.com

kaiosID

kaiosID is a cloud-based traceability solution. It allows brands to fight the increasing threats of counterfeiting and illicit trade and build consumer trust by adding smartphone readable, invisible and unique patterns on the product's packaging.

>> johan.wuethrich@kaiosid.com

Megaverse Sàrl

Megaverse is a cloud-based cybersecurity training platform whose objective is to reduce human vulnerability in the face of cyberattacks. Its aim is to become a global reference in cybersecurity training, and to help companies identify their weaknesses and adapt their cybersecurity strategies accordingly.

>> cm@megaverse.com

OMNE

OMNE's mission is to eliminate the overwhelming complexity of the internet by creating personalized sequences of high-quality content that is as effortless to watch as TV.

>> matthias.strodtkoetter@gmail.com

Oxygen at Work AG

Oxygen at Work improves the air quality in indoor environments combining the best from nature and modern technology.

>> manuel.winter@oxygenatwork.org

vestr AG

vestr facilitates the creation and life-cycle management of Actively Managed Certificates; a flexible and cost-effective alternative to investment funds.

>> rico.blaser@vestr.com

>>venture>> Audience Award Nominees

The nominees for the 2019 >>venture>> Audience Award were selected out of the 30 >>venture>> Finalists by RTS and >>venture>> based on the appeal of their products on everyday life. This selection procedure is separate from our jury process.

The Swiss audience voted online for their favorite startup and the one with the most votes will be presented with CHF 10,000 to jumpstart their entrepreneurial journey. The winner will be announced this evening at the Award Ceremony.

SWISTOR

Swistor

Swistor provides a disruptive energy storage solution that allows the charging of devices in seconds with an extended battery lifetime all while using environmentally-friendly materials.

>> clara.moldovan@epfl.ch
